Inflation

Figure 1 shows three postage stamps: 1968, 1978, and 2006— 6 cents, 13 cents, and 39 cents. Each stamp has the same value. Each stamp is first-class postage in the United States. Each stamp has a different price and a different date. What changed between 1968 and 2006 wasn't the value of the stamp, it was the value of the dollar.

Bond Returns in Years Stocks Were Down, 1926-2012

Bond returns are represented by the performance of the Barclays Aggregate Bond Index from January 1976 through December 2013 and by a composite of the IA SBBI Intermediate-Term Government Bond Index (67%) and the IA SBBI Long-Term Corporate Bond Index (33%) from January 1926 through December 1975. Stock returns are represented by the performance of the S&P 500 Index. Past performance is no guarantee of future results. It is not possible to invest directly in an index. Index performance is not meant to represent that of any Fidelity mutual fund. Diversification does not ensure a profit or guarantee against a loss.
